Solutions Driven by People.

BE-5301 | Round Deheading Table Highly Efficient Deheading.

- Streamlined workflow from deheading to filleting.
- Tailored for salmonids.
- 2 ergonomic workstations with hydraulic adjustment.
- Effortless fish handling: no lifting required.
- Configurable for left- or right-handed deheading.
- Hygienic open-frame design for easy cleaning.
- Water spray guns at every deheading station.
- Optional extra 3-4 deheading stations, with pace control for up to 30 fish/min.

Next Generation of Highly Efficient Deheading.

The BE-5301 integration streamlines your production process by significantly reducing the need for manual fish handling and lifting. This enhancement optimizes workflow and enables a consistent operation pace, allowing for up to 30 fish to be processed per minute. Such efficiency not only boosts throughput but also enhances the overall quality and yield of the deheading process.

Designed for salmonid processing, the deheading table is robust, stable, and meets strict hygiene standards. It integrates easily into existing lines, offering adaptability for various capacity needs. With its ergonomic design, including height-adjustable platforms, the BE-5301 ensures a comfortable working environment that meets industry standards.

Machine

Model	BE-5301
Dimensions Max. outer dimensions	3.975 mm
Capacity	Up to 30 fish/min
Power Consumption	2.4 kW
Electricity	3 x 400V + N + PE / 3 x 220V + PE
Weight Approx.	900 kg
